

# GLOBAL STANDARD COOLER COOL-Line AR

### GLOBAL STANDARD CooL-Line AR

#### RUGGED ENVIRONMENT COOLING SYSTEMS

#### PRODUCT INFORMATION

AKG CooL-Line is a standard line of products from the market leader in high performance aluminium cooling systems. AKG is best known for its world-wide presence, German engineering and extremely reliable product quality on the one hand and very competitive prices on the other hand.

The CooL-Line type series consist of different models for mobile and stationary applications and are available through our global specialist dealer network. This line of products embraces all-purpose complete cooling systems that comply with European or American Standards, is suited for normal or rugged environmental operating conditions, is powered by AC-, DC- or hydraulic-motor-driven fans and is also available with noise-optimized models.

All of AKG's solutions have been developed with stateof-the-art technology, produced in compliance with the highest quality standards and are comprehensively tested in the company's own research and test facility.

#### **FEATURES OF THE AR SERIES:**

- The coolers are equipped with anti-clogging fins
- High-Performance cooling assemblies
- AC-motor powered fan
- The heat is transferred from the medium to be cooled to the ambient air
- Cooler can be universally used in hydraulic oil, transmission oil, engine oil, lubricating oil and coolant circuits
- For the cooling of mineral oil, synthetic oil, biological oil as well as of HFA, HFB, HFC and HFD liquids and water with at least 50 per cent of antifreeze and anticorrosive additives (other media available)
- Can be exposed to operating pressures of up to 26 bar or 17 bar, depending on model

#### **BENEFITS:**

- Especially suited for rugged environments. Fin system prevents clogging and is easy to clean
- Highly flexible complete, ready-to-use cooling packages
- Compact and robust design, field-tested during many years of use in rugged real life conditions

- Largest and most comprehensive series of industrial coolers
- Best heat transfer results per given cooler size due to comprehensive research and development
- Highest quality due to professional engineering and in-house manufacturing
- Available from stock or at short notice
- As a standard, equipped with AKG's patented double-life hollow sections designed to increase cooler service life
- Noise-optimized models available (low-noise series)

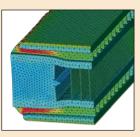

CooL-Line uses patented AKG hollow profiles to reduce local peak strains. This way the strength of heat exchangers is significantly increased and their service life time considerably prolonged.

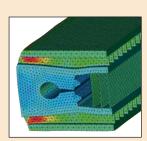

#### - Reduced Strain:

Strength calculations show that when using AKG hollow profiles maximum strain is reduced by a factor of 2

- Prolonged Service Life Time: Extensive rig tests have shown that service life time increases by a factor ranging from 3 to 5

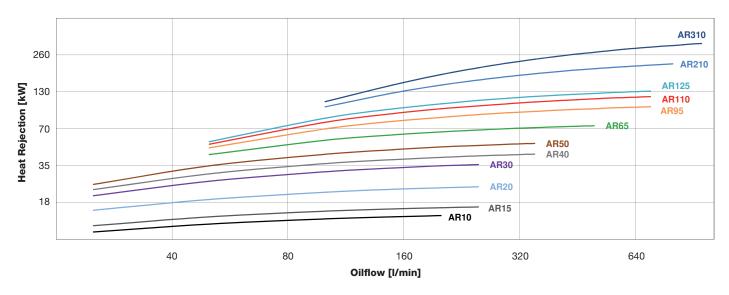

with hollow profile

#### **EASY SIZING DIAGRAM**

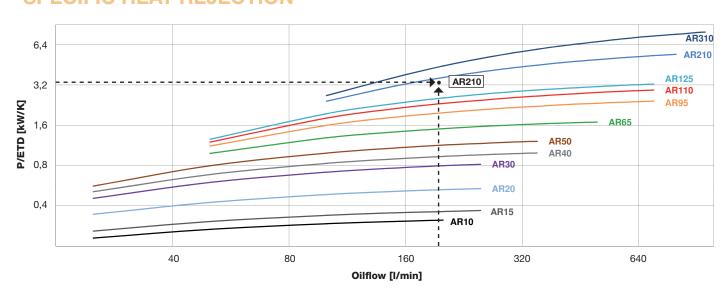

#### FOR ENTRANCE-TEMPERATURE-DIFFERENCE 40 K

Selection by Specific Heat Rejection:		
1. Input Data:		Example
Required Heat Rejection	P =	130 kW
Oilflow through Cooler	V =	200 l/min
Oil Inlet Temperature	T_Oil	70 °C
Cooling Airflow Temperature	T_CAF	30 °C
2. Determination of Specific Heat Rejection:		
Entering-Temperature-Difference	ETD =	70 °C - 30 °C = 40 K
Required Specific Heat Rejection	P/ETD	130 kW/40 K = 3,25 kW/K
3. Select According to Diagram and Result:		Next higher curve AR 210

#### **COOLER DIMENSIONS AR110 TO AR310**

#### STANDARD SCOPE OF SUPPLY OF OIL-TO-AIR COOLING SYSTEM

Cooler made of painted aluminium

Plastic fan

Fan-shroud, fingerguard, support feet and motorholder all made of steel (zinc plated or powder coated)

Motor

### AKG – A STRONG GLOBALLY INTEGRATED GROUP OF COMPANIES

AKG is a globally leading supplier of highperformance coolers and heat exchangers as well as customised system solutions, that comply with the highest quality standards.

On a world-wide scale, 2,800 employees work at 12 manufacturing facilities located in Germany, France, United Kingdom, Latvia, the U.S.A., China and India. Together with a number of additional oversea sales companies they are on duty around the clock.

The longstanding and competent partnership with global OEM customers from 22 lines of business such as construction machinery, compressed-air systems, agricultural and forestry machines, vehicle construction and many other fields of application give fresh and innovative impetus to the mobile and industrial standard type series.

AKG operates one of the world's largest research, development, measurement and validation centres for cooling solutions and customised applications.

For 90 years AKG's heat exchangers have stood for innovative solutions as well as highest engineering and manufacturing competence.
